

Assignment -4

Docker and Kubernetes

Assignment Date	21 October 2022
Student Name	SNEHA S
Student Roll Number	113119UG07087
Maximum Marks	2 Marks

1.Pull an image from docker hub and run it in docker Playground

The screenshot shows a web browser with two tabs. The first tab is Docker Hub, displaying the repository page for `uifd/ui-for-docker`. The repository is marked as deprecated, with a note stating: "A web interface for Docker, formerly known as DockerUI. Deprecated, use Portainer for new features." The Docker Pull Command is shown as `docker pull uifd/ui-for-docker`.

The second tab is Docker Playground, showing a session titled `cd9an2u3_cd9av060qau0008hbjs0`. The interface includes a sidebar with a timer (03:42:30), a "CLOSE SESSION" button, and an "Instances" section. The main area displays the IP address `192.168.0.13` and an "OPEN PORT" button. Below this, there are fields for Memory and CPU, and an SSH command: `ssh ip172-18-0-4-cd9an2u3tccg00fgf6k0@direct.labs.play-w`. There are also "DELETE" and "EDITOR" buttons.

The terminal window at the bottom shows the following commands and output:

```
# This is a sandbox environment. Using personal credentials is HIGHLY discouraged. Any consequences of doing so are completely the user's responsibilities.
# The FWD team.
#####
[node1] (local) root@192.168.0.13 ~
$ docker pull uifd/ui-for-docker
